

# Cohort Overview

**Mia M. Gaudet, Ph.D.**

Connect Chief Scientist

Trans Divisional Research Program  
Division of Cancer Epidemiology and Genetics  
National Cancer Institute

Last Updated:  
November 6, 2023

# Study Objectives

**Comprehensive research resource using new technologies and methods for the scientific community to study:**

## **Cancer Etiology**

- Precursor to Tumor Progression
- Cancer Risk Prediction
- Early Detection of Cancer
- Survivorship

## Connect Designed to Address Key Research Priorities

Emerging exposures

Novel biomarkers, genomics

Cutting-edge methodology

Diverse and special populations

# Cohort Study Design Overview & Recruitment Update

# Key Study Design Features of Connect

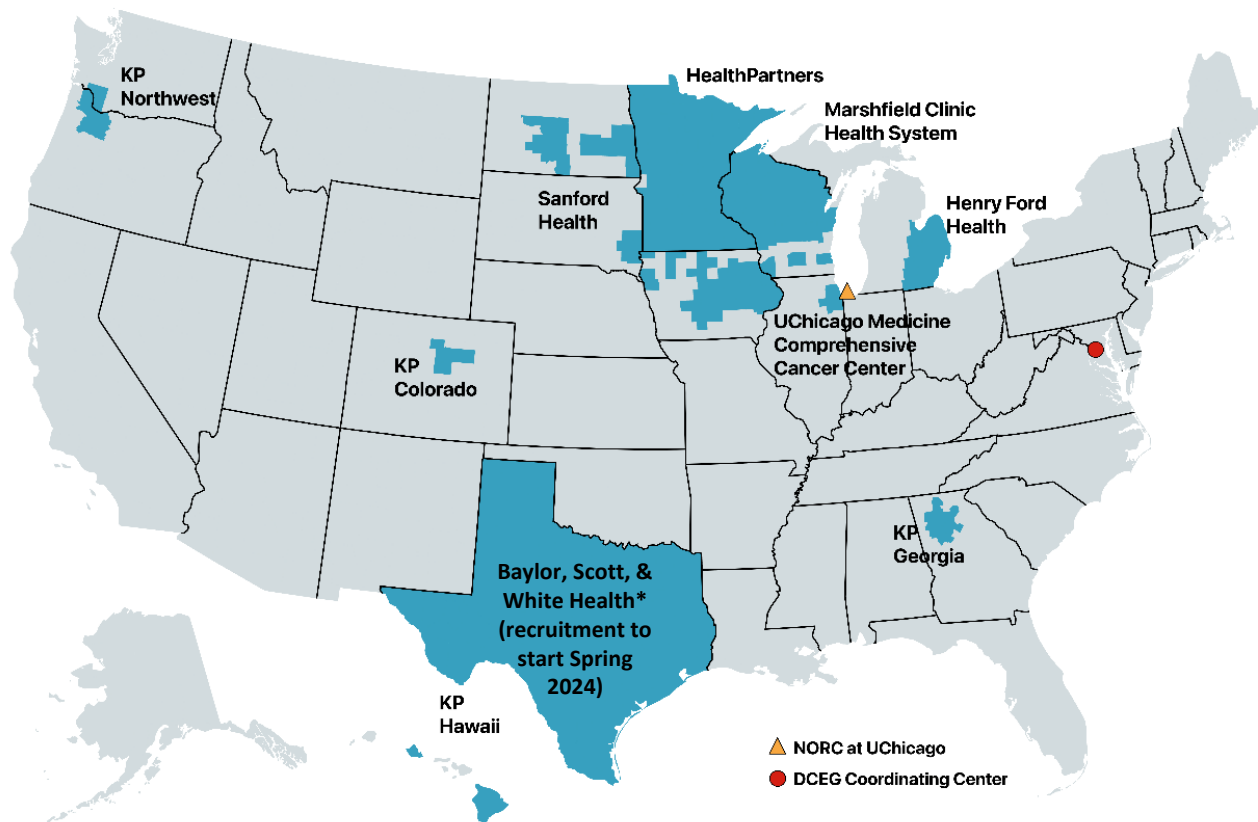

- ▶ 200,000 adults across the US
  - ✓ Aged 40–65 years **Expanding to 30-70 in Jan 2024**
  - ✓ No history of cancer
  - ✓ Patients or members of partner health care systems
- ▶ Long-term follow-up
- ▶ Serial assessments
- ▶ Comprehensive cancer and precancer outcomes
- ▶ Flexible infrastructure for enhancement studies

# Serial Assessments to Observe Longitudinal Changes

# Recruitment through 10 U.S. Integrated Health Care Systems

# Scaling up recruitment

# Participant Engagement

## Recruitment Materials & Strategy

- Value proposition to anchor communications
- Prevention-focused messaging
- Materials designed to engender trust, enthusiasm, and inclusivity
- Monetary and non-monetary incentives
- Active and passive recruitment

**Connect today.  
Prevent cancer  
tomorrow.**

**connect**  
for cancer prevention study

# Retention Strategies

- Candid messaging about participant burden for the long-term
- Responsive communication using multiple channels
- Incentives for retention, such as return of results

# Ongoing Engagement Strategies

- Digital engagement
- Regular contact every 6 months beyond those for study activities
- “Study anniversary” mailing
- Monitor real-time metrics to pivot engagement strategy

# MyConnect Participant App

## What is the Connect for Cancer Prevention Study?

This research study will explore causes of cancer and learn how to better prevent cancer in adults. Since it takes time to understand what causes cancer, Connect will go on for many years. The longer you participate, the more we may learn.

Researchers will study things like habits, behaviors, and the environment you and others live in that can help us learn how cancer may form. Researchers hope to learn new ways to stop cancer from forming in the first place

Connect is studying cancer prevention. Researchers will not look for treatments for cancer, give medical care, or share medical advice.

# Messages and Data Input

# Biospecimen Collections

# Biospecimen Collections at Recruitment

	No. Tubes	Fraction	Tube Type
<b>Buccal</b>	1		Saliva-mouthwash kit
<b>Blood</b>	2	Serum	10ml Red top
	1	Plasma/buffy coat	10ml Lavender top (EDTA)
	1	Plasma/buffy coat	10ml Green top (Heparin)
	1	Whole blood	10ml ACD <b>Streck</b>
<b>Urine</b>	1		10ml Urine kit
<b>Tissue</b>			Precursor tissue blocks, if available

# Biospecimen Collections at Follow-up

- Timed on average every three years
  - More frequent for participants at higher risk of cancer
- Series of same biospecimens and new types of biospecimens (e.g., liquid biopsy, stool)
- Located at healthcare system, external clinic, home
- Paired with questionnaires and other relevant data collection

# Surveys

# Baseline Surveys

## Background and Overall Health

- Background Information
- Medical History
- Family History of Cancer
- Education and Occupation

## Medications, Reproductive Health, Exercise, Sleep

- Medications
- Pregnancy History
- Physical Activity
- Sleep

## Smoking, Alcohol, Sun Exposure

- Tobacco
- Marijuana
- Alcohol
- Sun Exposure

## Where You Live and Work

- Residential History
- Commuting

### First Survey

This survey is split into four sections that ask about a wide range of topics, including information about your medical history, family, work, and health behaviors. You can answer all of the questions at one time, or pause and return to complete the survey later. If you pause, your answers will be saved so you can pick up where you left off. You can skip any questions that you do not want to answer.

#### Background and Overall Health

Questions about you, your medical history, and your family history.

Start

*Estimated Time: 20 to 30 minutes*

#### Where You Live and Work

Questions about places where you have lived and worked, and your commute to school or work.

Start

*Estimated Time: 20 to 30 minutes*

#### Medications, Reproductive Health, Exercise, and Sleep

Questions about your current and past use of medications, your exercise and sleep habits, and your reproductive health.

Start

*Estimated Time: 20 to 30 minutes*

#### Smoking, Alcohol, and Sun Exposure

Questions about your use of tobacco, nicotine, marijuana, and alcohol, as well as your sun exposure.

Start

*Estimated Time: 20 to 30 minutes*

# Surveys Accompanying Biospecimen Collection

## Blood & Urine

- Recent exposures to food, drink, pharmaceuticals
- Reproductive Health
  - Last menstrual period date

## Menstrual Cycle

- Next menstrual period date

## Mouthwash

- Oral health and care
- Recent exposures to toothpaste, mouthwash, gum, tobacco
- Permanent teeth lost

## COVID-19

- Exposure
- Complications
- Long-COVID
- Vaccination

# Surveys available in MyConnect

Baseline	<a href="#">Background &amp; Overall Health</a>	Demographics, medical history, family history of cancer, education & occupation
	<a href="#">Medications, Reproductive Health, Exercise, Sleep</a>	OTC/rx, menstrual cycle, pregnancy, fertility, hormonal meds & contraception, physical activity, shiftwork
	<a href="#">Smoking, Alcohol, Sun Exposure</a>	Tobacco/nicotine, marijuana, alcohol, tanning
	<a href="#">Where You Live &amp; Work</a>	Residential, seasonal, & childhood addresses, water source, tap water intake, work & school commute
	<a href="#">SSN</a>	Full or partial SSN
Biospecimens	<a href="#">Blood, Urine, Mouthwash (Research Appt)</a>	Symptoms/behaviors on day of donation, meds/antibiotics, recent reproductive health, oral hygiene & health
	<a href="#">Blood/Urine (Clinical Collection)</a>	Symptoms/behaviors on day of donation, meds, recent reproductive health
	<a href="#">COVID-19</a>	# Infections, symptoms, hospitalization, vaccination
	<a href="#">Menstrual Cycle Survey</a>	Last period, triggered by research appt/clinical collection response

# Surveys In Development

<a href="#">Participant Experience</a>	MyConnect, study communications, activities completed, overall experience, motivation for joining
<a href="#">Cancer Screening History</a>	Organ Inventory (born with/current), history of cancer screening tests
<a href="#">Cancer Diagnosis Surveys</a> (17)	Dx, symptoms, Patient-Provider interaction, medical history repeat assessment
<a href="#">Menstrual &amp; Intimate Care Products</a>	Vaginoplasty, powder, douching, vaginal cleansing products, menstrual products
<a href="#">Fecal Collection</a>	Donation, bowel movements, meds, supplements, probiotics
<a href="#">Social Determinants of Health (SDOH)</a>	Discrimination, police interaction, medical mistrust, social support, and financial, food, and housing insecurity
<a href="#">Hair Products</a>	Dyes, relaxers, straighteners, perms, oils
<a href="#">Menstrual Experience Survey</a>	Menstrual problems, endometriosis dx and treatment
<a href="#">Mothballs &amp; Scented Products</a>	Household exposure to p-DCB & Napthalene

Detailed Status Available [Here](#)

## Planned Survey Cadence

6 Months	Within 24 Months	12 Months	2 Years
<ul style="list-style-type: none"><li>• Diet food frequency questionnaire (DHQ)</li></ul>	<ul style="list-style-type: none"><li>• Repeated 24-hour recalls for diet (ASA24) and physical activity (ACT24)</li></ul>	<ul style="list-style-type: none"><li>• Screening History</li><li>• Quality of life (PROMIS)</li><li>• Psychosocial</li><li>• Social determinants of health</li></ul>	<ul style="list-style-type: none"><li>• Baseline exposures repeat assessment</li><li>• Consumer products (Menstrual &amp; intimate care, Hair, mothballs &amp; scented)</li><li>• Menstrual experience (Endometriosis)</li></ul>

### 3-6 Months Post-Cancer Diagnosis Rapid Case Ascertainment

- Cancer Diagnosis Surveys (Dx, symptoms, patient-provider interaction, medical history)
  - Quality of life (PROMIS: repeat assessment & patient specific)

# Data Linkages

## Data Linkages

# Geographic Information

- Geocode 20-year address histories (collected on baseline survey)
- Enable linkages to datasets for numerous external risk factor and exposure information
- Useful for planning ancillary field studies
- Add daily movement and travel to exposure information via MyConnect

# Wearable Devices and Apps

- Connect will have research-grade and consumer-oriented devices available
- Key domains where tech can improve assessment of exposures and risk factors:
  - sleep
  - light at night
  - air pollution
  - physical activity

# Estimated Outcomes

## Estimated total number of incident invasive cancers

Cancer site	Total Number of Expected Incident Cancers	
	10 years of follow up	15 years of follow up
Prostate (males only)	1,951	3,595
Breast (females only)	1,566	2,553
Lung & Bronchus	1,151	2,165
Colorectal	877	1,566
Melanoma of the Skin	410	681
Non-Hodgkin Lymphoma	369	649
Uterine Corpus	345	579
Urinary Bladder	327	622
Thyroid	232	356
Pancreas	221	410
Leukemia	203	365
Ovary	146	246

## Estimated Total Number of Precursor Lesions

Lesions	Total Number of Expected Precursor Lesions	
	Retrospective at Baseline	Prospective at 10 Years of Follow Up
Colorectal Adenomas	5,778	18,311
Benign Breast Biopsies (females only)	2,339	4,942
Dysplastic Nevus	2,311	3,779
Cervical Biopsies (females only)	2,137	2,822
High-Grade Prostatic Intraepithelial Neoplasia (males only)	238	384
Lung Nodules	165	349

# Data System Infrastructure & Digital Tools

Designed to maximize F.A.I.R. principles

# F.A.I.R. Data Ecosystem Makes F.A.I.R. Data

## Principles

### Findable

- Unique data identifiers and metadata that is searchable using web-based tools

### Accessible

- Retrievable data by identifiers based on a shared governance model

### Interoperable

- Data architecture that allows for integration of data from a range of sources and applications

### Reusable

- Goal of F, A, and I to allow reuse of data, code, and tools

## Implementation in Connect

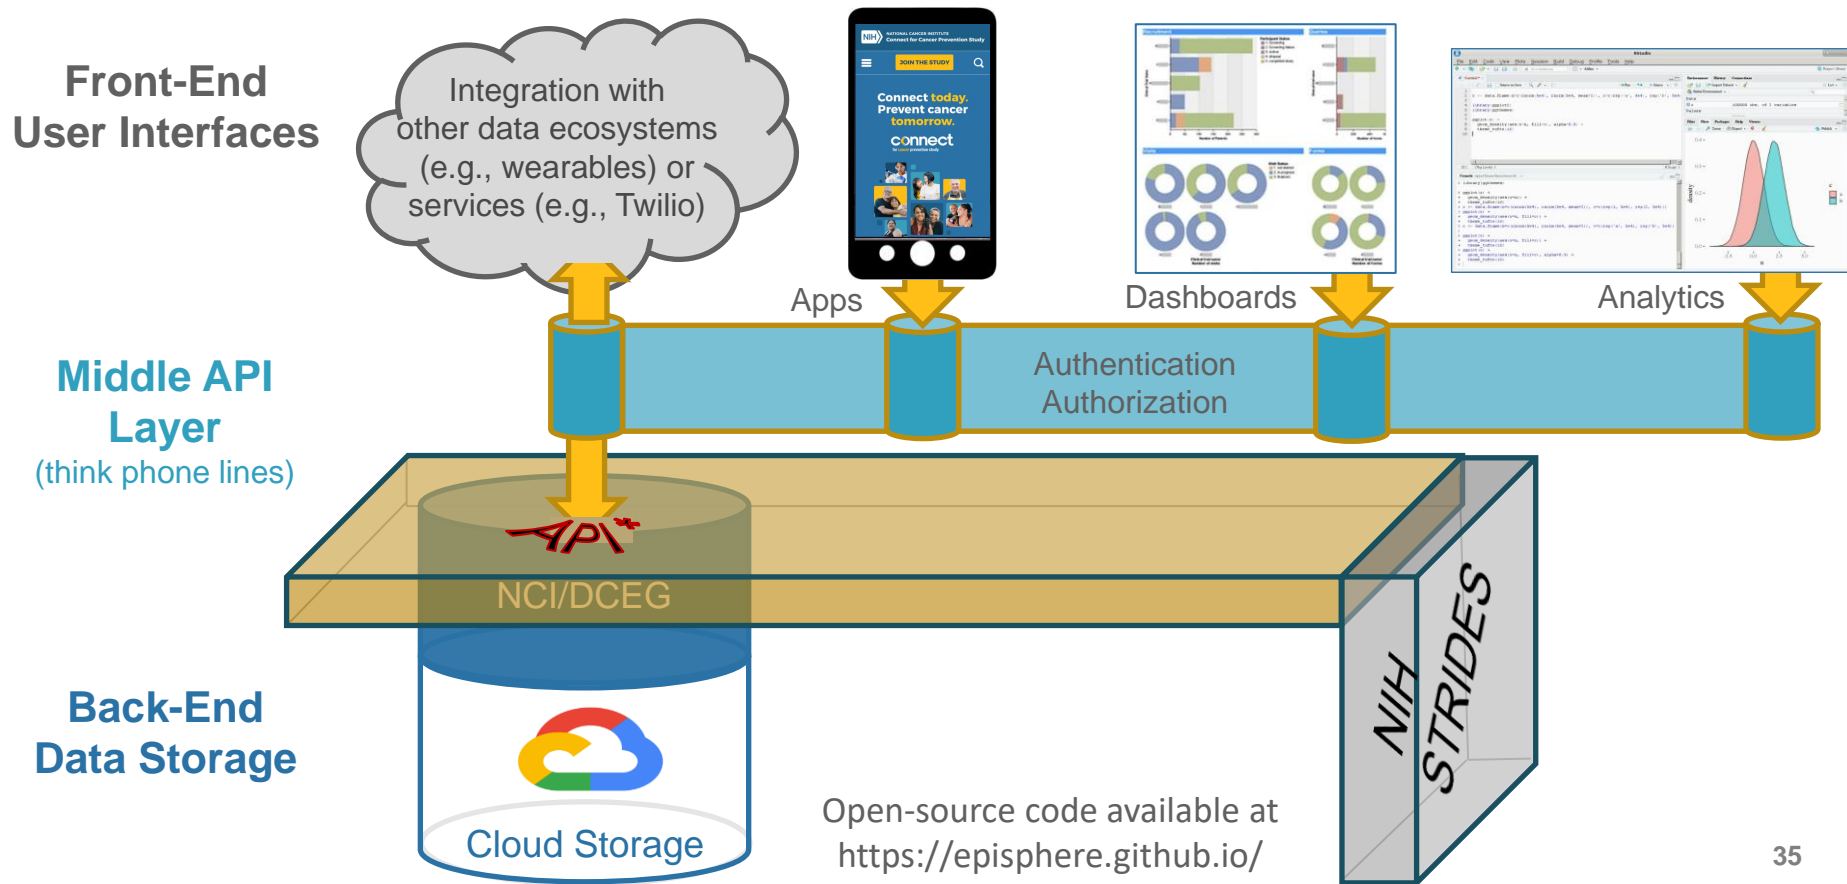

- Online, searchable data dictionary
- Map variables to common thesaurus to aid pooling (planned)

- Authentication and authorization parameters to enforce governance
- Online governance and instructions for data access (when data available)

- Cloud-based data available through governed APIs

- Data, metadata, code, tools and infrastructure available through public, versioned, open-source code on [GitHub](https://github.com)

# Connect Data Ecosystem provides an interoperable infrastructure

# Example of Front-End User Interface: MyConnect Participant App
