

# Menstrual Cycle Survey

**This survey will be sent to participants who answer that they had a menstrual period in the last 60 days, as indicated on their biospecimen survey.**

Survey content:

[SrvBIU\_MENSINTRO\_v1r0] Hormones and other signals in the body change throughout the menstrual cycle. With information about the start date of your menstrual periods before and after you donated samples, we can pinpoint where you were in your menstrual cycle when you donated your samples.

When you donated samples for the Connect for Cancer Prevention Study, you may have told us the date of your last menstrual period. If you told us the date of your last menstrual period, you said it started on <insert date from [SrvBIU\_MENSTART\_v1r0] >. If this is blank, you did not provide this information, but your answers to this survey are still important for our research.

1. [SrvBIU\_MENS1\_v1r0] Has your next menstrual period started?  
0      No --> **GO TO END MESSAGE**  
1      Yes --> **GO TO [SrvBIU\_MENS2\_v1r0]**
2. [SrvBIU\_MENS2\_v1r0] Please provide the first day that your next menstrual period started. This information helps researchers figure out where your body was in the menstrual cycle on the day you donated samples. If you do not remember the exact day, please make your best guess:

<Calendar to indicate date \_\_/\_\_/\_\_> **(Required field)**

[error message if someone clicks NEXT without entering a date]: Please use the calendar to select the date that your next menstrual period started.

(After completing question 2 skip to SUBMIT SCREEN).

END MESSAGE following a “No” response: “Thank you. When your next menstrual period starts, please return to complete this survey.” **[EXIT AND CLEAR CACHE]**

SUBMIT SCREEN: Generic message: “You have answered all of the questions in this survey. To submit your answers, select the “Submit Survey” button.”
